PROJECT BASED IT SOLUTIONS

Sphere Project based services are designed to minimize the risk associated with critical or large-scale projects. With our experienced team of technicians, we will focus our resources to aggressively define your specific problems, solve them, and deliver high quality results throughout the project execution.

IT DEVELOPMENT SERVICES

From custom software development with the latest tech to automated quality assurance, you get all types of software development services to help you build, sustain, and modernise enterprise software as well as our extensive 20 year expertise in building IT solutions.

CONSULTING SERVICES

We take the time to gain a full understanding of how your IT projects relate to the business initiatives of the organization giving us the ability to match the right resources to the environment.

IT STAFFING SOLUTIONS

Our proven recruitment, assessment and selection methods ensure that we identify the talent with the necessary skills and personal attributes that will add value to your organization.

MANAGED IT SERVICES

A highly-customizable, full-service IT plan that proactively manages your business evolving needs. we focus on creating sustainable IT environments that are cost-effective.

WE'VE WORKED WITH A DIVERSE CUSTOMER BASE. HOW CAN WE HELP YOU?

We look forward to having an opportunity of proving that; Sphere is not just another IT firm. We have worked very hard to design, implement and maintain a technical strategy that can make a real difference to our clients.
